

UGCS UNIVERSAL GROUND CONTROL STATION

Textron Systems evolved its proven, U.S. Army program-of-record One System® Ground Control Station to create the UGCS for next-generation mission capability. The UGCS is designed to be a joint services solution, incorporating a flexible, scalable architecture to meet current and future U.S. Department of Defense and international requirements.

TEXTRON Systems

► PUSHING PAST POSSIBLE

NEXT-GENERATION UAS COMMAND AND CONTROL

UNIVERSAL EASE OF USE

Web-based interfaces

Improved climate control

Easy-to-read displays

Ergonomic crew stations

Embedded training capability

UNIVERSAL CAPABILITY

- > Able to control Textron Systems' Shadow® Tactical Unmanned Aircraft System (UAS), General Atomics' Gray Eagle™ and Northrop Grumman's Hunter UAS
- > Meets or exceeds established interoperability profiles including NATO Standardization Agreement 4586 and Army standards
- > Continuous enhancements including service-oriented architecture, multi-service commonality and multi-platform adaptability

UNIVERSAL MISSION PERFORMANCE

Compatible with the all-digital Tactical Common Data Link for increased bandwidth and data security

Command and control, payload control, and weapons control capabilities

Easily reprogrammed to control new aircraft, payloads, and data links based on customer preference

Modular hardware and software
