Textron Systems evolved its proven, U.S. Army program-of-record One System® Ground Control Station to create the UGCS for next-generation mission capability. The UGCS is designed to be a joint services solution, incorporating a flexible, scalable architecture to meet current and future U.S. Department of Defense and international requirements.
**UNIVERSAL CAPABILITY**

- Able to control Textron Systems’ Shadow® Tactical Unmanned Aircraft System (UAS), General Atomics’ Gray Eagle™ and Northrop Grumman’s Hunter UAS

- Meets or exceeds established interoperability profiles including NATO Standardization Agreement 4586 and Army standards

- Continuous enhancements including service-oriented architecture, multi-service commonality and multi-platform adaptability

**UNIVERSAL EASE OF USE**

- Web-based interfaces
- Improved climate control

- Easy-to-read displays
- Ergonomic crew stations

- Embedded training capability

**UNIVERSAL MISSION PERFORMANCE**

- Compatible with the all-digital Tactical Common Data Link for increased bandwidth and data security

- Easily reprogrammed to control new aircraft, payloads, and data links based on customer preference

- Command and control, payload control, and weapons control capabilities

- Modular hardware and software
