

# DAMOCLES™ LAUNCHED EFFECT

## DECISIVE LETHALITY IN PEER WARFARE

Damocles™ launched effect delivers a lightweight, modular, Vertical Takeoff & Landing (VTOL) system designed to provide a fully autonomous or semi-autonomous search and strike capability. Damocles system delivers a next-generation top-attack munition with a revolutionary lethal warhead.

### Features & Benefits

- > No launch or recovery equipment, significantly reducing logistic footprint.
- > Standoff attack: Gen-2 Explosively Formed Penetrator (EFP) Warhead provides lethality overmatch.
- > Fully autonomous search and attack capability with FMV feedback for human-in-the-loop control.
- > Modular Open System Approach (MOSA) designed to meet current and future customer requirements.
- > Textron Systems is the foremost developer and manufacturer of sophisticated U.S. policy compliant top-attack munitions.

### DAY/NIGHT AUTOMATIC TARGET RECOGNITION (ATR)

In all weather conditions

### OPERABLE IN GPS-DENIED ENVIRONMENT

Provides a relocatable loiter and precision strike at all ranges

### GROUND LOITER OPTION

Enhances time on target area
